

HAZEL GARALDE

SOFTWARE ENGINEER

I have always been passionate about coding. The intricate logic behind it mesmerizes and encouraged me to learn more. I want to be a part of a company where I can contribute my knowledge.

MY PORTFOLIO

<https://hazelgaralde.vercel.app/>

Front-End: ReactJS
Deployed in Vercel

Back-End: NodeJS, ExpressJS (For Sending Email)
Deployed in Heroku

Pages:

- Home
- About Me
- Projects
- Tech Stacks
- Contact

HERMOSA - *ongoing*

<https://capstone3-vercel.vercel.app/>

admin account: *admin@email.com*

password: *admin*

Front-End: React, HTML, CSS and Javascript. Deployed in Vercel
<https://gitlab.com/hazelg21/capstone3-garalde>

Back-End: MongoDB, NodeJS and ExpressJS. Deployed in Heroku
<https://gitlab.com/zuitt-projects13/b144-garalde/ecommerce-api>

Hermosa is an Ecommerce website for selling hair products. I am still in the process of adding additional features, updating the design and mobile responsiveness.

Functionalities:

- Register
- Login
- View and Update Profile Information
- Change Password

---User Only

- Search for products (returns active products only)
- View all active products
- View details of an active product
- Add the product to Cart
- View Cart content
- Modify Quantity
- Remove item from the Cart
- Checkout Cart
- View Order History and status of delivery

---Admin Only

- Search for a product (returns all products)
- Add new product
- View all products
- Activate and Inactivate product
- View and Update product information
- View all orders (can be filtered: All, Processed and Pending)
- Process a product

PROJECTS

TIME TRACKER APP - *ongoing*

<https://time-tracker-app-alpha.vercel.app/>

Front-End: React, HTML, CSS and Javascript. Deployed in Vercel

Back-End: MongoDB, NodeJS and ExpressJS. Deployed in Heroku

Time Tracker App is one of my ongoing projects. When working for a project it is important to monitor the steps taken to fix issues and create features. The time tracker app will help determine which tag and activity took the most time to do.

Functionalities:

- Register
- Login
- Checkin - Create tags (e.g. *Fix Navigation Bar*) and add activities to each tag (e.g. Update responsiveness).
- View Tag Detail - View all information about a tag, delete activity in the tag, close the tag, and delete the tag.
- Activities - See all created tags. Sort: All, By Tag and By Date (*ongoing*)
- Logout
